Clario Home Care Pump

**For airway suctioning at home and while traveling
hygienic, portable and simple**

■ Superior hygiene

Nothing is worse than an overflow. Thanks to the Clario's unique hygienic design, this problem will be eliminated. Should a user forget to insert the swimmer in the suction canister or in case of a rare malfunction, the SafetyChamber collects any overflowing secretions. The membrane system prevents all secretions from entering the internal parts of the pump, so frequent filter changing is not necessary.

■ Advanced portability

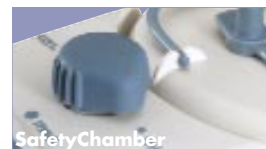

Take Clario anywhere. Weighing only 4.4 lbs (2.0 kg) including battery, this compact, durable device can be taken everywhere and is powered by electricity, a long-life NiMH battery pack, or even a 12 V connection cable in the car. The handy carrying bag ensures easy portability and makes the Clario always as mobile as its user.

■ User Friendly

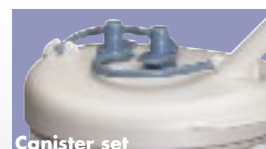

Finally, a home care pump that's easy for anyone to handle. It is simple – the only switches are the on/off switch and vacuum regulator with 3 settings: minimum, medium, maximum. You can set the suction strength exactly and repeatedly. The suction canister is plugged into the SafetyChamber, making confusing tubing connections a thing of the past.

Membrane system
no internal overflow or cross-contamination

SafetyChamber
with 3 preset vacuum settings

Canister set
perfect size for fast vacuum build-up

Lightweight
Only 4.4 lbs! take it everywhere

Clear settings
easy to explain and use
